What is ArchPass?

ArchPass is UGA's phone-enabled two-step login solution, powered by Duo. It is required for access to several University systems, including the vLab, the Remote Access VPN and systems that hold sensitive or restricted data.

To access a system protected by ArchPass, users must:

1) Enter their MyID and password
2) Verify their ID with a phone or tablet enrolled in Duo. Users can verify their ID with a push notification to a smartphone, a passcode generated through the Duo Mobile App; an SMS text notification to their cell phone; or a phone call to their cell phone or landline phone.

Who is eligible for ArchPass?

Any student, faculty or staff member with a MyID will be required to use ArchPass to access certain university systems.

How do I set-up ArchPass?

To use ArchPass, UGA’s two-step login powered by Duo, you will need to enroll a device with the Duo application. You can enroll any smartphone, mobile phone, landline phone or tablet. Duo lets you link multiple devices to your account, so you can use your mobile phone and a landline, two different mobile devices or any combination that is useful to you.

You can begin enrolling devices through the Self-Service enrollment portal on the ArchPass website. You can also enroll devices through most systems that are protected by ArchPass.

An enrollment video is available on the main ArchPass webpage, or you can find instructions in our Enrollment Guide.

How do I use Duo to access an applications protected by ArchPass (CAS applications, vLab)?

CAS applications protected by ArchPass, such as eLC and Athena, and the vLab, have two steps to the login process instead of one:

1) Enter your MyID and password
2) Verify your ID with a phone or tablet enrolled in Duo. You can verify your ID with a push notification to a smartphone, a passcode generated through the Duo Mobile App; an SMS text notification to your cell phone; or a phone call to your cell phone or landline phone.

Coming soon: ArchPass required for access to eLC, Athena, Employee Self-Service site

In mid-March, the login process for several UGA systems will change. Students, faculty and staff will need to use ArchPass, powered by Duo to access the following:

- eLearning Commons, for users with a MyID (elc.uga.edu), effective March 12
- Employee Self-Service Site (employee.uga.edu), effective March 12
- Athena (athena.uga.edu), effective March 23

When logging in to each of these systems, you will enter your MyID and password, and then verify your ID with a phone or tablet enrolled in Duo.

Requiring ArchPass for these systems helps ensure the continued security of student and employee data.

Enroll your devices and find more info at archpass.uga.edu.

Requiring ArchPass for these systems helps ensure the continued security of student and employee data.
You can find instructions for using ArchPass to access the VPN here.
