Help Desk Support (HDS) Home

Update older email clients, web browsers to continue using Office 365
On October 31, Microsoft will make updates to Office 365 applications that may affect your ability to access UGAMail.

Legacy applications, including Thunderbird, older versions of Mac Mail and others will no longer work. If you have one of these applications, you will need to update, or begin using a web browser to access your email.

The latest versions of Outlook for desktop and mobile devices will continue to work, as well as the latest version of Mac Mail and Mail for iOS. The latest versions of Chrome, Firefox and Safari will also work.

For a complete list of supported clients and browsers, please visit our UGAMail page.
