Registering Your Device

To register your device:

1. Visit drp.uga.edu on any laptop or phone.

   UGA Network Registration

   UGA Device Registration Portal (DRP)
   Help

   What is the Device Registration Portal?
   Buildings on campus at the University of Georgia include access to the University’s wired network, which requires devices to be connected via an Ethernet cable.

   Students, faculty and staff in specific buildings on campus may access the wired network through a self-registration service called the Device Registration Portal (DRP).

   This simple process requires a MyID and password in order to register devices. Students, faculty and staff must also accept the UGA computer use policy. You may start this process by clicking on the “I Accept” button below.

   The Device Registration Portal only applies to wired connections. For wireless service, there are UGA-supported wireless networks on campus available to UGA students, faculty and staff with a MyID.

   For assistance, please contact the EITS Help Desk at 706-542-3108.

   Additional instructions about DRP and wireless networks are available on the EITS Help Desk website at http://helpdesk.uga.edu.

   UGA Policy on the Use of Computers
   The University of Georgia Student Code of Conduct prohibits students from violating published University policies. Any student found violating the UGA Computer Use Policy may be referred to the Office of Student Conduct. The sites listed below, except from the UGA Computer Use Policy, contain use of the access network.

2. Read the description and policy. Click Accept at the bottom of the page.

3. Provide your MyID and password to log in

   UGA Network Registration

   Network Registration User Login
   Help

   In order to use and access UGA network resources you must first register your machine for use.

   Please enter your UGA MyID and password below. (Your MyID is a username you use to login to various University systems.) Then, click on Login to proceed.

   UGA MyID
   Password

   Login

4. Once logged in, you will see the device registration page. Scroll down to MAC Address.

5. This page automatically tries to register the network card you are using, so it will need to be changed. To do so, click Clear.
6. Once you have the MAC Address of your device, **type it in the MAC Address field**.
   - Under Description, **type a general description**, such as “Smart TV.”
   - Under Device Type, **scroll to select Other Devices**.

7. Click **Register**.

   Wait 10 minutes for registration to take effect, then restart your device. Your device should connect upon startup.

If you need technical assistance, please contact the EITS Help Desk at 706-542-3106. Please advise the Help Desk you are having issues with receiving **Internet service** on your device.
