Using Duo without Wifi or Mobile connection while traveling.

If you have a smartphone, you can generate a passcode through the Duo app without a Wi-Fi connection or cellular coverage.

1) Open the Duo Mobile App.
2) Tap the down arrow next to the Duo-Protected University of Georgia. The Duo mobile app will generate a passcode.
3) Type the provided passcode into the passcode or second password field in the VPN client.

4) Tap the two arrows in a circle to refresh and get a new passcode
