I'm a new incoming student. Do I have to use ArchPass to log in to UGA systems?

Once you receive your UGAMail address, you are required to enroll devices in ArchPass and begin using it to log in to protected systems, such as Athena, eLC and your UGAMail when off-campus.

New incoming students, including all undergraduates, typically receive their UGAMail address once they have paid their commitment deposit. Once you have your UGAMail address, you will be prompted to enroll devices the next time you log in to an ArchPass-protected system.
