What is ArchPass?

ArchPass is UGA’s phone-enabled two-step login solution, powered by Duo. It is required for access to several University systems, including Athena, the Remote Access VPN and systems that hold sensitive or restricted data.

When logging in to each of these systems, you will enter your MyID and password, and then verify your ID with a phone or tablet enrolled in Duo.

Requiring ArchPass for these systems helps ensure the continued security of student and employee data.

Enroll your devices and find more info at archpass.uga.edu.

To access a system protected by ArchPass, users must:

1) Enter their MyID and password

2) Verify their ID with a phone or tablet enrolled in Duo. Users can verify their ID with a push notification to a smartphone, a passcode generated through the Duo Mobile App; an SMS text notification to their cell phone; or a phone call to their cell phone or landline phone.

What devices are supported?

Here is a list of all the supported devices and authentication options available for each:

<table>
<thead>
<tr>
<th>Supported Devices</th>
<th>Push notification through Duo app</th>
<th>Passcode through Duo app</th>
<th>SMS Text</th>
<th>Phone Call</th>
</tr>
