How Do I Access vLab?

vLab is available via three methods:

1. Web Browser
2. Citrix Workspace
3. Select computer labs on campus, such as the Miller Learning Center.

The vLab service is available at http://vlab.uga.edu:

1. If you are accessing vLab from a non-lab device, you will also need to verify your ID with ArchPass, UGA’s two-step login solution, powered by Duo. Non-lab devices include personal laptops, phones, classroom podiums, iMac and Mac Pro machines at the Miller Learning Center, and computer work stations. You will be prompted to enroll in ArchPass the first time you log in to vLab from one of these devices.

2. Enter your UGAMyID (the first part of your UGAMail address) and your password.
3. Click on the vLab icon in the middle of the screen.
4. You will see a new window open. vLab will authenticate you and take you to the vLab desktop.
5. When that process is complete, you will be on the vLab desktop. You may now use vLab just like someone using it in a computer lab.
