How do I cross-list my courses?

eLC courses are automatically cross-listed based on data from Athena. Courses that are taught at the same time, in the same location, by the same instructor should be automatically cross-listed with no action required by you.

We can also create manual cross-listings based on your needs. For example, we can cross-list all of the BIOL1108L courses so that the instructor can manage the course content in only one course as opposed to 10 courses. Or we can cross-list the three sections of the same course, ACCT2101, that you are teaching. Instead of managing 3 separate courses, you'd only need to manage the content for one course.

- Please click the Request Support link to the right of this article to request a manual cross-listing.
